

DATA & SYSTEMS

- SURVEYS + OUTPUTS
- MONDAY.COM
- WEBSITE
- DASHBOARDS
- AUTOMATIONS
- V1.0

Data is the proof. **Every program claims impact. Data shows it.** Surveys, outputs, systems, automations, website, dashboards, and Monday.com — this department is the infrastructure layer that makes everything else credible and sustainable.

CHAIRS

Louis Smith · Vincent Culley

ADVISORS

Kirk Willabus · Casey Jostine

EXEC BOARD LIAISON

Carl McCray

CHAIR SWIM LANES

CHAIR 1 Systems & Monday.com Owns Monday.com administration for the entire org. Builds and maintains all department boards. Trains Chairs on their boards. Identifies and builds automations. Manages survey tool setup.	CHAIR 2 Surveys & Impact Designs, distributes, and analyzes all pre/post surveys (BEST + C100). Compiles annual impact report. Builds sponsor impact reports. Aggregates volunteer hours from all departments annually.	CHAIR 3 Website Oversees the E100 website (Maven — coordinate with Ashley Neely). Manages impact number updates, scholarship application form, event listings, and quarterly technical health checks.
---	--	--

DEPARTMENT OVERVIEW

SURVEYS

Pre + Post

BEST Academy and C100 pre/post surveys. Measures program impact. Feeds annual report.

IMPACT OUTPUTS

Annual Report

Compiles all org-wide data into the annual impact report. ➡ *Upload space: add most recent annual impact report here when available.*

UPLOAD NEEDED

Annual Impact Report — Most Recent Version

We still need this for an update. Upload the most recent annual impact report when ready.

used by Partnerships, Gala, and Exec Board.

MONDAY.COM

Primary System

Data owns Monday.com setup and administration. Every committee's boards live here.

WEBSITE

Data Oversees

E100 website oversight — updates, accuracy, and alignment with current programs and impact data.

DASHBOARDS

Real-Time Visibility

Internal dashboards showing program health, volunteer hours, survey results, and fundraising progress.

AUTOMATIONS

Think Through + Build

Identify manual processes that can be automated — Monday.com automations, form integrations, notifications.

Data doesn't just count things — it tells the story in numbers. When Partnerships needs to close a \$30,000 sponsorship, it uses data. When the Gala program booklet says "96% of students feel more prepared for leadership" — Data produced that number. Every claim E100 makes publicly is backed by something this department tracked.

Data is the connective tissue of the org's systems. Monday.com, the website, survey tools, communication forms — Data sets them up, maintains them, and ensures they're actually being used. If a system isn't working, Data fixes it. If a process could be automated, Data builds it.
